I Think We Can Build A Better Airplane

[illegible]

The Boeing Stratocruiser was destined for journeys across continents and oceans nonstop. Comfort was paramount: extra-wide cabins and air conditioning, dressing rooms and sleeping berths, a spiral staircase and lower deck lounge. Speed was essential: the fastest wing of its day, a cruising speed of 340 mph over a range of 4,000 miles. The Stratocruiser set the stage for the launch of the jet age.

She is called the Queen of the Sky: the Boeing 747. And she rules with unprecedented range and extraordinary comfort. This newest version can fly 400 passengers one-third of the way around the world nonstop. The 747-400 is one of three Boeing models flying transoceanic skies today. And by mid-decade they'll be joined by the new 777, giving global travelers a world of range and comfort to choose from.

March 1992

Introduction

The Market Research Department of Boeing Commercial Airplane Group is pleased to bring you the latest edition of **World Jet Airplane Inventory**. This document contains data on the world commercial jet airplane fleet (including some military derivatives) and reflects the status of this fleet as accurately as possible as of December 31, 1991. (Any fleet changes that have occurred since year-end 1991 will not be reflected in these data.)

Several changes have been made to this edition that incorporate some of the ideas we received from you on last year's reader response card. As you will notice, we are again asking for your comments on the enclosed reader response form. We welcome your comments and hope that you will take a few minutes and let us know what you think of this edition of World Jet Airplane Inventory.

Notes on the Contents

World Jet Airplane Inventory is composed of a selected number of reports from JETTRACK, a computer-based jet airplane inventory system. Fleet data in this system are obtained from many different sources, including airframe manufacturers, airplane owners and operators, governments, and trade publications.

This document provides details for announced orders, deliveries, and inventories for all commercial jet airplanes built in the United States and Western Europe with a capacity of 60 seats or more. In addition, the year-end 1991 inventory data in Sections 5 and 7 include non-Soviet operators of the Tupolev TU-134, Tupolev TU-154, and Ilyushin IL-62 built in the USSR.

The tabulations include all airplanes delivered to the market through December 31, 1991. Not included are those airplanes that were never sold but are (or were) used exclusively for the manufacturers' private purposes, such as flight testing, route proving, short-term leasing, etc.

Many older airplanes are stored intact or in derelict condition at many different locations around the world, and are not expected to fly again. The cost of restoring these airplanes to flight status often far exceeds their market value. A serious attempt has been made to exclude these run-outs from the counted inventories shown in this document.

The year-end fleet data in previous issues of this book have often been quoted as "airplanes in service." It should be emphasized that the counted inventory includes a number of airplanes that were not in service at the end of 1991. Obvious cases are airplanes in the inventories of airlines, manufacturers and leasing companies which were parked pending resale, repairs, hushkitting, freighter conversion, etc.

Section 1 provides a graphical overview of the world jet airplane inventory from 1965-1991. The data shown includes all owners/operators unless noted otherwise. Fleet age distribution by region and average age by model are shown for year-end 1991.

Announced orders, deliveries, and backlog are summarized in Section 2. Orders that were placed and later cancelled are treated as if they never occurred. The difference between total airplanes delivered through year-end 1991, and the year-end 1991 fleet, are those airplanes removed from the inventory as summarized in Section 2, Table 8. All sections beyond this summary represent the year-end 1991 fleet, and do not include these airplanes that have been removed from inventory.

In section 3, the year of delivery to the original operator is used to summarize the age distribution of the year-end 1991 fleet by major world regions. **Age distribution for the fleets of individual airlines is not disclosed in this document**.

Section 4 shows jet airplane inventories at year-end for the time period 1967 through 1991. Section 5 presents the 1991 fleet by model and series. Section 6 summarizes the same data by region and includes regional subtotals. Section 7 provides year-end 1991 fleet details for each owner/operator contained in these data and now includes the engine model.

Leased airplanes are included in the operators' fleets. Section 8 provides details on airplanes leased out by airlines. Airplanes listed under the name of a leasing company in this document reflect only those airplanes owned but not leased out at year-end. **The activities of leasing companies are not disclosed in this document**.

Abbreviations

Operator names in this document are often abbreviated and therefore may vary from official names. Some frequently used abbreviations of operator names include:

AL......... Airline(s), Aerolineas, etc.
AT .... Air Transport, AeroTransportes, etc.
AVN ..... Aviation
AW ...... Airways
GOVT... Government
INTL .... International
SVC ..... Service, Services
TA .... Transportes Aeros, etc.

Owner/operator categories used in this document are coded as:

A .... Airlines

P .... Private Operators

G .... Government Operators

X .... Manufacturers/Brokers/Leasing Companies

Three letter abbreviations are used for airplane models. These abbreviations are mostly self-explanatory with the following exceptions:

CVR .... Convair 880 and 990
M80 ..... MD-80 (DC-9-80)
M90...... MD90
D10 ..... DC-10
M11 ..... MD-11
L10 ...... L-1011
727 727-100
72S 727-200
737 ...... 737-100/200/T43A
73Q 737-300/400/500

Airplanes built in Western Europe:

A30 ...... A300
A31 ...... A310
A32 ...... A320
321 ...... A321
A33 ...... A330
A34 ...... A340
BAC .... BAC 1-11
146 ...... BAe 146
CMT .... Comet
CON .... Concorde
CVL ..... Caravelle
F10 ...... F100
MRC ... Mercure
TRD ..... Trident
V10 ...... VC10

Sections 5, 7, and 8 provide details by airplane model and series. Some of the codes used as series identifiers are explained here.

Series ending with:

"**F**" or "**FH**" are original freighters, convertibles in permanent all-cargo use, and airplanes originally delivered as passenger airplanes that were later fitted with a large cargo door. The BAe 146-200QT is a freighter.

"**C**" or "**CH**" are convertibles. Some airplanes in this category are used as freighters while remaining convertible. 707-320C/-320CH configured as freighters are still listed as -320C/-320CH.

"**M**" are combis.

"**H**" are hushkitted airplanes.

"**RE**" or "**RF**" are Valsan conversions.

NOTE: (1) Deliveries exclude airplanes which were built, but which never entered the market. They are -or were- used by manufacturers for testing purposes, etc.
(2) W/O=Written-Off: accidents, fire, sabatoge, acts of war or terrorism.
(3) Retired: broken up or to be broken up in near future, cannibalized for parts, used for ground training or fire practice, used for structural testing, abandoned or stored in derelict condition.
(4) Preserved: on display, or intended for future display.
(5) Stored: airplanes which have been stored intact for long periods but not expected to be restored to flight status.

SECTION 7

Section 7

Year-End 1991 Jet Airplane Inventory By Owner/Operator

Table 1 .... Airlines

Table 2 .... Private Operators

Table 3 .... Government Agencies

Table 4 .... Manufacturers, Brokers, and Leasing Companies

Details for non-Soviet operators of the Tupolev-134, Tupolev-154 and Ilyushin IL-62 passenger airplanes built in the USSR are also included in this section
